

Jira Test Cases

Issue: SCRUM-6

Summary: VWO LOGIN page requirement

Okay, let's solidify this QA test case generation request based on your provided Jira issue and description.

****1. Login Page Validation - Critical & High Priority****

```
*  **ID:** TC-001
*  **Title:** Verify Email and Password Authenticate Successful Login
*  **Priority:** High
*  **Type:** Regression Testing
*  **Preconditions:** VWO Login Dashboard Functional.
*  **Test Data:** Valid email and password combo (e.g., test@example.com / testpassword), Successful User Se
*  **Steps:**
    1. Navigate to the VWO Login Dashboard.
    2. Enter valid Email address in the "Email" field.
    3. Enter valid Password in the "Password" field.
    4. Click "Login".
*  **Expected Result:** A user successfully logs into VWO, redirecting to the VWO dashboard, and displaying
*  **Overall Expected Result:** Successful login to VWO.
*  **Assumptions/Coverage Gaps:** Testing user agent compatibility with supported email formats.
```

****2. Error Handling - Critical & High Priority****

```
*  **ID:** TC-002
*  **Title:** Verify error message on invalid password (password not found)
*  **Priority:** High
*  **Type:** Regression Testing
*  **Preconditions:** Successfully logged into VWO.
*  **Test Data:** Invalid Email & Password combo.
*  **Steps:**
    1. Navigate to the Login Dashboard with a failed Password.
    2. Enter invalid email and password combination.
    3. Click "Login".
*  **Expected Result:** An appropriate and informative error message is displayed: "Incorrect username or p
*  **Overall Expected result** - Ensure the error message is visible and user friendly to the user.
*  **Assumptions/Coverage Gaps:** Validate various error conditions, e.g. length validation for email/passwo
```

****3. Swipe-to-Login - Medium Priority****

```
*  **ID:** TC-003
*  **Title:** Verify User Experience with Swipe Gesture on Login Form
*  **Priority:** Low
*  **Type:** Usability Test
*  **Precondition:** User has successfully logged into a VWO System
*  **Test Data:** User will simulate swiping on the login panel to trigger the login process
*  **Steps:**
    1. Locate the login panel
    2. Simulate a swipe to transition user to login page
*  **Expected Result:** Automatic redirection to the login pages (no errors or distractions).
*  **Overall Expected Result:** Smooth User flow.
*  **Assumptions/Coverage Gap:** The login should transition into the dashboard without visual clutter or c
```

****4. Multi-Factor Authentication - Medium Priority****

```
*  **ID:** TC-004
*  **Title:** Verify Multi-Factor Authentication - Successful Login with Token
*  **Priority:** Medium
*  **Type:** Functional Testing
*  **Preconditions:** User logged into VWO with valid Email and Password
*  **Test Data:** Valid Email/Password (for login), and a properly generated access token for multi factor a
*  **Steps:**
    1. Navigate to VWO login.
    2. Enter successful email and password
    3. Click login button, redirect to login page with valid credentials
*  **Expected Result:** Redirect the user and successfully login with the user's access token.
```

* **Overall Expected Result:** Verification that Multi-factor authentication is functioning as per the specification.
* **Assumptions/Coverage Gaps:** Test with minimal user errors (e.g., incorrect tokens)

****5. Enhanced UI - Low Priority****

* **ID:** TC-005
* **Title:** Test UX Feedback - Large Button with Text
* **Priority:** Low
* **Type:** Regression Test
* **Precondition:** Login Functionality Working.
* **Test Data:** Login Interface
* **Steps:**
1. Verify the "Login" button has the message "Login"
2. Verify that button text is clearly visible to users.
* **Expected Result:** Verify that button should read "Login" and it has visual prominence with text.
* **Overall Expected Result:** Verify the UI display of button and associated text to maintain UI consistency.
* **Assumptions/Coverage Gaps:** Assess UI response on different browsers/devices.

****6. Security Policy Verification - Medium Priority - Automated****

* **ID:** TC-006
* **Title:** Verify Session Timeout for Unapproved Login.
* **Priority:** Medium
* **Type:** Security Test
* **Preconditions:** Successful Login with logged-in User.
* **Test Data:** User Login
* **Steps:**
1. Test a user logging in with a session expiry timer set. Test the time it takes after the session expires.
* **Expected Result:** Session will log out successfully after expiry.
* **Overall Expected Result:** It should have been completely logged out within a set time limit after session expiry.
* **Assumptions/ Coverage Gaps:** A test to check the response time of an activity of an automated verification.

****7. Data Privacy Consideration - Medium Priority - High Emphasis****

* **ID:** TC-007
* **Title:** Verify GDPR compliance during session logging and display
* **Priority:** Medium
* **Type:** Data Validation Test
* **Preconditions:** - Successfully login and logged into a system.
* **Test Data:** Valid Login credentials.
* **Steps:**
1. Verify user's sessions are properly logged and all data logged should be accessible for GDPR compliance.
2. Verify for data privacy, where applicable any data for a user cannot be shared (eg. name, details with other users).
* **Expected Result:** - Should have full set of data privacy, while the functionality to process data should be maintained.
* **Assumptions/Coverage Gaps:** GDPR compliance considerations should be evaluated for all aspects of the data handling.

****Important Notes and Next Steps:****

* **Prioritization:** Based on priority and impact, the testing steps can be further refined into detailed test cases.
* **Test Data Design:** Create comprehensive test data sets for testing edge cases and boundary values to ensure robustness.

To help further refine this test case generation, could you provide:

- * Specific branding guidelines for the VWO login dashboard?
- * Detailed expected user workflows?
- * Any existing technical architecture/component details?
